1900 S Norfolk, Suite 350 – #45  
San Mateo, CA 94403650

## Company Overview:

Hammerspace Inc. is a leading technology company specializing in data mobility, orchestration, and data management solutions. Established in 2018, we have been at the forefront of revolutionizing how businesses store, manage, and access their data. Our cutting-edge software platform allows enterprises to seamlessly move and manage data across hybrid and multi-cloud environments, making data storage more flexible, agile, and cost-effective. Our customers, ranging from small businesses to large/multi-national enterprises, trust us to address their most demanding data workflow challenges. Hammerspace has a strong U.S. Federal Government presence with cleared personnel and worldwide adoption of innovative technologies that meet government compliance needs.

## Company FAQ for DoD

All principal officers and Directors are of US Nationality. Hammerspace sells and services software products globally either directly or through a reseller or third-party service provider and maintains offices in the US.

## Core Competencies:

- 1. Data Management Solutions:** Hammerspace offers advanced data management solutions that empower businesses to seamlessly manage, access, and protect their data across hybrid and multi-cloud environments. Our platform enables simplified data mobility, reducing complexity and increasing operational efficiency.
- 2. Storage Orchestration:** We specialize in storage orchestration for Mission critical, enterprise AI, HPC workflows, delivering a unified data fabric that spans across disparate storage infrastructure. Our unique approach allows you to optimize storage resources, enhancing performance and reducing costs.

- 3. Data Mobility and Portability:** Hammerspace's innovative software technology facilitates seamless data mobility and portability across various cloud providers and on-premises infrastructure. Move your data without friction and regain control of your data assets.
- 4. Global Namespace:** Our Global Namespace feature unifies data across multiple storage systems, enabling a single view of your data regardless of the underlying infrastructure. Simplify data access and eliminate silos with our groundbreaking solution.
- 5. Data Security and Compliance:** Hammerspace prioritizes data security and compliance, offering advanced encryption, access controls, ransomware protection, and auditing capabilities.
